Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Aerodynamic Analysis of an Installed Thrust Reverser B00-001
Three-Dimensional Disturbance Vortex Method for Simulating Rotor/Stator Interaction in Turbomachinery B00-021
Study of Boundary-Layer Development in a Two-Stage Low-Pressure Turbine B00-025
Effects of Radial Location on the Migration of Hot Streaks in a Turbine B00-054
Effect of Initial Velocity Profile on the Development of Round Jets B00-097
Comparison of Spray/Wall Impingement Models with Experimental Data B00-133
Three-Dimensional Optimization Method for Turbomachinery Blade Design B00-163

Aerospace Plane

Adiabatic Interaction of Particles with a Compressible Flow: Basic Mechanics B00-058

Deceleration Systems

Aerodynamic Analysis of an Installed Thrust Reverser B00-001

Fuels and Fuel Systems

Ideal Gas Thermodynamic Properties of Propellants and Explosive Compounds B00-015
Adiabatic Interaction of Particles with a Compressible Flow: Basic Mechanics B00-058
Optimization of Jet Mixing into a Rich, Reacting Crossflow B00-106

Performance

Status and Perspective of Externally Fired Gas Turbines B00-080
Comment on "Shock-Loss Model for Transonic and Supersonic Axial Compressors with Curved Blades" B98-061
Reply by the Author to N. A. Cumpsty and C. Freeman B98-061

Powerplant Integration

Aerodynamic Analysis of an Installed Thrust Reverser B00-001
Engine Case Externals Challenges and Opportunities B00-012
Status and Perspective of Externally Fired Gas Turbines B00-080
Numerical Investigation of Installation Effects in Turbofan Engines B00-099
Performance of Evaporative Cycle Gas Turbines Derived from Aeroengines B00-142

Simulation

Three-Dimensional Disturbance Vortex Method for Simulating Rotor/Stator Interaction in Turbomachinery B00-021

Vibration

New Gear-Fault-Detection Parameter by Use of Joint Time-Frequency Distribution B00-047

Energy

Alternate Fuels

Mass Production of Antimatter for High-Energy Propulsion B00-016
Status and Perspective of Externally Fired Gas Turbines B00-080
Multicomponent-Fuel Film-Vaporization Model for Multidimensional Computations B00-136

Conservation

Power Generation Analysis for High-Temperature Gas Turbine in Thermodynamic Process B00-077

Conservation

Investigation of Regenerative Combustion Using a Heavy Fuel Oil B00-083

Fuel Cells

Lithium Peroxide Fuel Cells for Electric Vehicle Propulsion B00-051
Miniaturization Technologies for Advanced Energy Conversion and Transfer Systems B00-081

Hydrogen and Unique Fuels

Antimatter Requirements and Energy Costs for Near-Term Propulsion Applications B00-131

Magnetohydrodynamic Power Generation

Electrical Characteristics of Magnetohydrodynamic-Generator Sidewalls with Segmented Z-Bar Design B00-152

Reciprocating Machinery

Influence of Exhaust Aftertreatment Devices on a Heavy-Duty Diesel Engine's Particulate Emissions B00-091

Rotating Machinery

Experimental Investigation of Rotor-Inlet Guide Vane Interactions in Transonic Axial-Flow Compressor B00-059
Enhancing Direct-Fired Power Plants Performance by the Use of Gas Turbine Technology B00-079
Feasibility Study for Performance Prediction of Circumferentially Compound-Stage Model Turbines B00-098
Computation of Gas-Liquid Droplet Cascade Flows Using Multigrid Adaptive Unstructured Grid B00-141
Longitudinally Stratified Combustion in Wave Rotors B00-147
Application of Bethe-Zel'dovich-Thompson Fluids in Organic Rankine Cycle Engines B00-156
Comment on "Shock-Loss Model for Transonic and Supersonic Axial Compressors with Curved Blades" B98-061
Reply by the Author to N. A. Cumpsty and C. Freeman B98-061

Solar Power

Thermal State-of-Charge of Space Solar Dynamic Heat Receivers B00-096

Thermoelectric

Performance of Evaporative Cycle Gas Turbines Derived from Aeroengines B00-142

Fluid Dynamics

Aeroacoustics

Trailing-Edge Blowing for Reduction of Turbomachinery Fan Noise B00-008
Evaluation of Boundary Conditions for the Gust–Cascade Problem B00-010
Propagation of Spinning Acoustic Modes in Turbofan Exhaust Ducts B00-107

Boundary Layers and Heat Transfer—Turbulent

Measurements of Turbulent Flow Structure in Supersonic Curved Wall Boundary Layers B00-022
Effect of Inlet Conditions on Endwall Secondary Flows B00-040

Boundary-Layer Stability and Transition

Transition in Boundary Layers on a Concave Surface B00-094

Computational Fluid Dynamics

Numerical Simulations and Planar Laser-Induced Fluorescence Imaging Results of Hypersonic Reactive Flows B00-002
Three-Dimensional Flow Analysis of Turbine Blade Cascades with Leading-Edge Ejection B00-007
Computational Analysis of Stall and Separation Control in Centrifugal Compressors B00-009
Evaluation of Boundary Conditions for the Gust–Cascade Problem B00-010
Three-Dimensional Disturbance Vortex Method for Simulating Rotor/Stator Interaction in Turbomachinery B00-021
Optimization of Ram Accelerator Systems Design B00-038
Effect of Inlet Conditions on Endwall Secondary Flows B00-040
Progress in Modeling Pressure Oscillations in Regenerative Liquid Propellant Guns B00-042
Eulerian Approach for Unsteady Two-Phase Solid Rocket Flows with Aluminum Particles B00-043
Time-Accurate Three-Dimensional Navier–Stokes Analysis of One-and-One-Half Stage Axial-Flow Turbine B00-045
Simulations of the Flow in Supersonic Turbines with Straight Centerline Nozzles B00-052
Viscous Three-Dimensional Simulation of Transonic Compressor Stage on Parallel Hardware B00-055
Feasibility Study for Performance Prediction of Circumferentially Compound-Stage Model Turbines B00-098

Hydrodynamics

Stability of Plane Liquid Sheets in Compressible Gas Streams B00-089

Hypersonic Flow

Numerical Simulations and Planar Laser-Induced Fluorescence Imaging Results of Hypersonic Reactive Flows B00-002
Optimization of Ram Accelerator Systems Design B00-038

Inlet, Nozzle, Diffuser, and Channel Flows

Measurements of Turbulent Flow Structure in Supersonic Curved Wall Boundary Layers B00-022
Thrust Vector Control for (Clustered Modules) Plug Nozzles: Some Considerations B00-029
Propulsion System for Hypersonic Space Planes B00-035
Experiment to Support the Formulation and Validation of Compressor-Face Boundary Conditions B00-057
Scarfing and Scalloping Effects on Lobed Forced Mixer at Low-Speed Conditions B00-061
Flow of Gel Fuels in Tapered Injectors B00-063
Streamline Tracing: Technique for Designing Hypersonic Vehicles B00-064
Wall Drag in Internal Mach-2 Flow with Cavity and Transpiration Injection B00-065
Numerical Investigation of Installation Effects in Turbofan Engines B00-099

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Three-Dimensional Flow Analysis of Turbine Blade Cascades with Leading-Edge Ejection B00-007
Trailing-Edge Blowing for Reduction of Turbomachinery Fan Noise B00-008
Wall Curvature Effects on External Burning in Supersonic Flow B00-020
Flowfield near a Multiport Injector Array in a Supersonic Flow B00-032
Two-Dimensional Nonadiabatic Injection into a Supersonic Freestream B00-034
Viscous Three-Dimensional Simulation of Transonic Compressor Stage on Parallel Hardware B00-055
Wall Drag in Internal Mach-2 Flow with Cavity and Transpiration Injection B00-065
Visualisation of Fuel Jet in Conditions of Highly Preheated Air Combustion B00-084
Effect of Initial Velocity Profile on the Development of Round Jets B00-097
Optimization of Jet Mixing into a Rich, Reacting Crossflow B00-106
Effect of Inlet Turbulence and Premixer Length on Fuel Distribution in a Swirling Gas-Turbine Premixer B00-120
Optimization of Orifice Geometry for Crossflow Mixing in a Cylindrical Duct B00-132

Multiphase Flows

Eulerian Approach for Unsteady Two-Phase Solid Rocket Flows with Aluminum Particles B00-043
Adiabatic Interaction of Particles with a Compressible Flow: Basic Mechanics B00-058
Stability of Plane Liquid Sheets in Compressible Gas Streams B00-089
Reference Spray Combustion Facility for Computational Fluid Dynamics Model Validation B00-103
Comparison of Spray/Wall Impingement Models with Experimental Data B00-133
Multicomponent-Fuel Film-Vaporization Model for Multidimensional Computations B00-136
Computation of Gas-Liquid Droplet Cascade Flows Using Multigrid Adaptive Unstructured Grid B00-141

Plasmadynamics and MHD

Preliminary Mass Spectrometry of a Xenon Hollow Cathode B00-024
Pulse Detonation Magnetohydrodynamic Power B00-036
On-Orbit Demonstration of a Pulsed Self-Field Magnetoplasmadynamic Thruster System B00-125
Computation of the Plume of an Anode Layer Hall Thruster B00-128
Ion-Energy Diagnositcs in the Plasma Exhaust Plume of a Hall Thruster B00-130
Mass Spectral Measurements in the Plume of an SPT-100 Hall Thruster B00-151
Electrical Characteristics of Magnetohydrodynamic-Generator Sidewalls with Segmented Z-Bar Design B00-152
Pulsed Fusion Propulsion System for Rapid Interstellar Missions B00-153

Reacting Flows and Combustion

Numerical Simulations and Planar Laser-Induced Fluorescence Imaging Results of Hypersonic Reactive Flows B00-002
Confined Swirling Flows with Heat Release and Mixing B00-026
Ignition Characteristics of Plasma Torch for Hydrogen Jet in an Airstream B00-033
Pulse Detonation Magnetohydrodynamic Power B00-036
Combustor Model for Simulation of Combustion Instabilities and Their Active Control B00-067
Flame/Stretch Interactions of Premixed Fuel-Vapor/O_2/N_2 Flames B00-071
Modeling of Oxy-Natural Gas Combustion Chemistry B00-087

Separated Flows

Restricted Shock Separation in Rocket Nozzles B00-066
Visualisation of Fuel Jet in Conditions of Highly Preheated Air Combustion B00-084

Subsonic Flow

Numerical Investigation of Twin-Nozzle Rocket Plume Phenomenology B00-027
Automated Design of a Three-Dimensional Subsonic Diffuser B00-158

Supersonic Flow

Measurements of Turbulent Flow Structure in Supersonic Curved Wall Boundary Layers B00-022
Two-Dimensional Nonadiabatic Injection into a Supersonic Freestream B00-034
Transverse Injection from Circular and Elliptic Nozzles into a Supersonic Crossflow B00-062
Application of Bethe-Zel'dovich-Thompson Fluids in Organic Rankine Cycle Engines B00-156

Transonic Flow

Comment on "Shock-Loss Model for Transonic and Supersonic Axial Compressors with Curved Blades" B98-061
Reply by the Author to N. A. Cumpsty and C. Freeman B98-061

Unsteady Flows

Computational Analysis of Stall and Separation Control in Centrifugal Compressors B00-009
Evaluation of Boundary Conditions for the Gust–Cascade Problem B00-010
Study of Boundary-Layer Development in a Two-Stage Low-Pressure Turbine B00-025
Propulsion System for Hypersonic Space Planes B00-035
Time-Accurate Three-Dimensional Navier–Stokes Analysis of One-and-One-Half Stage Axial-Flow Turbine B00-045
Simulations of the Flow in Supersonic Turbines with Straight Centerline Nozzles B00-052
Effects of Radial Location on the Migration of Hot Streaks in a Turbine B00-054
Incidence Effects on Wake-Induced Transition on an Axial Compressor Blade B00-056
Experimental Investigation of Rotor-Inlet Guide Vane Interactions in Transonic Axial-Flow Compressor B00-059
Feasibility Study for Performance Prediction of Circumferentially Compound-Stage Model Turbines B00-098

Optimization of Orifice Geometry for Crossflow Mixing in a Cylindrical Duct B00-132
Linear Versus Quadratic Amplitude Feedback in Active Control of Compressor Rotating Stall B00-162

Viscous Non-Boundary-Layer Flows

Two-Dimensional Nonadiabatic Injection into a Supersonic Freestream B00-034

Vortices

Three-Dimensional Flow Analysis of Turbine Blade Cascades with Leading-Edge Ejection B00-007
Confined Swirling Flows with Heat Release and Mixing B00-026
Effect of Inlet Conditions on Endwall Secondary Flows B00-040
Scarfing and Scalloping Effects on Lobed Forced Mixer at Low-Speed Conditions B00-061
Numerical Study of Fuel Mixing Enhancement Using an Oblique Shock/Vortex Interaction B00-134

Guidance, Control, and Dynamics Technology

Control System Design

Propulsion System for Hypersonic Space Planes B00-035
Combustor Model for Simulation of Combustion Instabilities and Their Active Control B00-067
Hub-Based Vibration Control of Multiple Rotating Airfoils B00-161

Control System Sensors

Broadband Infrared Absorption Sensor for High-Pressure Combustor Control B00-140

Control Theory

Linear Versus Quadratic Amplitude Feedback in Active Control of Compressor Rotating Stall B00-162

Dynamics

Hub-Based Vibration Control of Multiple Rotating Airfoils B00-161
Linear Versus Quadratic Amplitude Feedback in Active Control of Compressor Rotating Stall B00-162

Engine Control

Computational Analysis of Stall and Separation Control in Centrifugal Compressors B00-009
Bleed Valve Rate Requirements Evaluation in Rotating Stall Control on Axial Compressors B00-113
Design and Control of Solid-Fuel Ramjet for Pseudovacuum Trajectories B00-117

Launch Vehicle Guidance and Control

Thrust Vector Control for (Clustered Modules) Plug Nozzles: Some Considerations B00-029

Optimization Techniques

Optimal Allocation with Network Limitation for Autonomous Space Power System B00-155
Automated Design of a Three-Dimensional Subsonic Diffuser B00-158

Spacecraft Guidance and Control

New Gear-Fault-Detection Parameter by Use of Joint Time-Frequency Distribution B00-047

Structural Control

Hub-Based Vibration Control of Multiple Rotating Airfoils B00-161

Interdisciplinary Topics

Aerospace Management

Optimal Allocation with Network Limitation for Autonomous Space Power System B00-155

Analytical and Numerical Methods

Computational Analysis for Rocket-Based Combined-Cycle Systems During Rocket-Only Operation B00-144

Atmospheric and Space Sciences

Prediction of the Dissipation of a Solid-Rocket Contrail B00-124

Sensor Systems

Broadband Infrared Absorption Sensor for High-Pressure Combustor Control B00-140

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

Simulations of the Flow in Supersonic Turbines with Straight Centerline Nozzles B00-052

Launch Vehicle and Sounding Rocket Systems

Overview of World Space Launches B00-122

Missile Systems

Design and Control of Solid-Fuel Ramjet for Pseudovacuum Trajectories B00-117

Propulsion and Propellant Systems

Third Way of Development of Single-Stage-to-Orbit Propulsion B00-014
Restricted Shock Separation in Rocket Nozzles B00-066
Nonpremixed Periodic Flames Supported by Heterogeneous Propellants B00-069
Role of Curing Agents on Decomposition and Explosion of Glycidyl Azide Polymers B00-104
Overview of World Space Launches B00-122
Impingement Heating and Ignition of Condensed-Phase Energetic Materials B00-149

Trajectories and Tracking Systems

Thrust Vector Control for (Clustered Modules) Plug Nozzles: Some Considerations B00-029

Propulsion

Airbreathing Propulsion

Trailing-Edge Blowing for Reduction of Turbomachinery Fan Noise B00-008
Identifying Optimal Fan Compressor Pressure Ratios for the Mixed-Stream Turbofan Engine B00-011
Engine Case Externals Challenges and Opportunities B00-012
Third Way of Development of Single-Stage-to-Orbit Propulsion B00-014
Wall Curvature Effects on External Burning in Supersonic Flow B00-020
Trajectory of a Liquid Jet Traversing Subsonic Airstreams B00-023

Injector Design and Characterization

Numerical Investigation of Hydrogen Strut Injections into Supersonic Airflows B00-003
Fuel Injection into a Supersonic Airflow by Means of Pylons B00-004
Trajectory of a Liquid Jet Traversing Subsonic Airstreams B00-023
Effect of Inner and Outer Airflow Characteristics on High Liquid Pressure Prefilming Airblast Atomization B00-041
Transverse Injection from Circular and Elliptic Nozzles into a Supersonic Crossflow B00-062
Flow of Gel Fuels in Tapered Injectors B00-063
Role of Oxygen-Enriched Atomization in Kerosene Spray Flames B00-121

Liquid Rocket Motors and Missile Systems

Third Way of Development of Single-Stage-to-Orbit Propulsion B00-014
Restricted Shock Separation in Rocket Nozzles B00-066
Fluid Circuit Model for Long-Bearing Squeeze Film Daper Rotordynamics B00-112
Thixotropic Effect of Inorganic Gel Fuels B00-164

Propulsion Hazards

Role of Curing Agents on Decomposition and Explosion of Glycidyl Azide Polymers B00-104

Ramjet Combustors

Trajectory of a Liquid Jet Traversing Subsonic Airstreams B00-023
Design and Control of Solid-Fuel Ramjet for Pseudovacuum Trajectories B00-117

Ramjets and Scramjets

Numerical Investigation of Hydrogen Strut Injections into Supersonic Airflows B00-003
Fuel Injection into a Supersonic Airflow by Means of Pylons B00-004
Self-Ignition and Supersonic Reaction of Pylon-Injected Hydrogen Fuel B00-005
Incomplete Mixing and Off-Design Effects on Shock-Induced Combustion Ramjet Performance B00-006
Numerical Investigation of Twin-Nozzle Rocket Plume Phenomenology B00-027
Joint Jet-A/Silane/Hydrogen Reaction Mechanism B00-050
Streamline Tracing: Technique for Designing Hypersonic Vehicles B00-064
Analysis of Transient Thermal Choking Processes in a Model Scramjet Engine B00-116
Numerical Study of Fuel Mixing Enhancement Using an Oblique Shock/Vortex Interaction B00-134
Solid-Fuel Ramjet Regulation by Means of an Air-Division Valve B00-148

Solid Rocket Motors and Missile Systems

Self-Ignition and Supersonic Reaction of Pylon-Injected Hydrogen Fuel B00-005
Phase-Stabilized Ammonium Nitrate-Based Propellants Using Binders with N–N Bonds B00-018
Improvements in the Chemical Stability of Double-Base Solid Rocket Propellants B00-019
Ignition Characteristics of Plasma Torch for Hydrogen Jet in an Airstream B00-033
Eulerian Approach for Unsteady Two-Phase Solid Rocket Flows with Aluminum Particles B00-043
Feasibility Assessment of Thermal Barriers for Extreme Transient Temperatures B00-048
Ultrasonic Method Applied to Full-Scale Solid Rocket Motors B00-072
Role of Curing Agents on Decomposition and Explosion of Glycidyl Azide Polymers B00-104
Oscillatory Combustion of Fine-AP/HTPB Propellants: Disproportionate Pyrolysis Response B00-123

Supersonic Combustion

Fuel Injection into a Supersonic Airflow by Means of Pylons B00-004
Incomplete Mixing and Off-Design Effects on Shock-Induced Combustion Ramjet Performance B00-006
Wall Curvature Effects on External Burning in Supersonic Flow B00-020
Numerical Investigation of Twin-Nozzle Rocket Plume Phenomenology B00-027
Flowfield near a Multiport Injector Array in a Supersonic Flow B00-032
Joint Jet-A/Silane/Hydrogen Reaction Mechanism B00-050
Wall Drag in Internal Mach-2 Flow with Cavity and Transpiration Injection B00-065
Analysis of Transient Thermal Choking Processes in a Model Scramjet Engine B00-116

Transient Combustion and Detonation

Oscillatory Combustion of Fine-AP/HTPB Propellants: Disproportionate Pyrolysis Response B00-123
Longitudinally Stratified Combustion in Wave Rotors B00-147
Characteristics of Pulverized Coal Combustion in High-Temperature Preheated Air B00-085

Space Technology

Space Processing

Regenerative Solid Oxide Fuel Cells for Mars Exploration B00-154

Space Systems

Antimatter Requirements and Energy Costs for Near-Term Propulsion Applications B00-131

Spacecraft Power

Thermal State-of-Charge of Space Solar Dynamic Heat Receivers B00-096
Regenerative Solid Oxide Fuel Cells for Mars Exploration B00-154

Spacecraft Propulsion System Integration

Very-Near-Field Plume Investigation of the Anode Layer Thruster B00-013
Preliminary Mass Spectrometry of a Xenon Hollow Cathode B00-024
Computation of the Plume of an Anode Layer Hall Thruster B00-128
Ion-Energy Diagnositcs in the Plasma Exhaust Plume of a Hall Thruster B00-130
Regenerative Solid Oxide Fuel Cells for Mars Exploration B00-154

Structural Mechanics and Materials

Structural Design

Feasibility Assessment of Thermal Barriers for Extreme Transient Temperatures B00-048

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

Localized Thermal Buckling Due to Hot Streaks in a Combustor Liner B00-095

Structural Dynamics and Characterization

Mechanical Coupling Effects on Turbomachine Mistuned Response B00-160

Structural Finite Elements

Localized Thermal Buckling Due to Hot Streaks in a Combustor Liner B00-095

Thermal Effects

Feasibility Assessment of Thermal Barriers for Extreme Transient Temperatures B00-048

Localized Thermal Buckling Due to Hot Streaks in a Combustor Liner B00-095

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition, and Degradation

Regression Rate Behavior of Hybrid Rocket Solid Fuels B00-017

Aerothermodynamics/Thermal Protection

Ideal Gas Thermodynamic Properties of Propellants and Explosive Compounds B00-015

Gas Turbine Heat Transfer: Past and Future Challanges B00-082

Computational Heat Transfer

Numerical Thermal Model of NASA Solar Electric Propulsion Technology Application Readiness Ion Thruster B00-049

Gas Turbine Heat Transfer: Past and Future Challanges B00-082

Simulation of Coupled Unsteady Flow and Heat Conduction in a Turbine Stage B00-159

Cryogenics

Miniaturization Technologies for Advanced Energy Conversion and Transfer Systems B00-081

Electronics Cooling

Miniaturization Technologies for Advanced Energy Conversion and Transfer Systems B00-081

Nonintrusive Diagnostics

Line-of-Sight Variations of Temperature and Species in Solid Propellant Flames B00-070

Visualisation of Fuel Jet in Conditions of Highly Preheated Air Combustion B00-084

Radiation in Participating Media

Line-of-Sight Variations of Temperature and Species in Solid Propellant Flames B00-070

Thermal Modeling and Analysis

Power Generation Analysis for High-Temperature Gas Turbine in Thermodynamic Process B00-077

Thermal State-of-Charge of Space Solar Dynamic Heat Receivers B00-096

Prediction of the Dissipation of a Solid-Rocket Contrail B00-124

Multicomponent-Fuel Film-Vaporization Model for Multidimensional Computations B00-136

Thermochemistry and Chemical Kinetics

Phase-Stabilized Ammonium Nitrate-Based Propellants Using Binders with N–N Bonds B00-018

Modeling of Oxy-Natural Gas Combustion Chemistry B00-087

Chronological Index

B96-172 Triggering of Longitudinal Combustion Instabilities in Rocket Motors: Nonlinear Combustion Response. Josef M. Wicker, William D. Greene, Seung-Ill Kim, and Vigor Yang, *Pennsylvania State University* (**12**, 6, p. 1148) Article

Technical Comment by V. S. Burnley, *U.S. Air Force Phillips Laboratory*; and F. E. C. Culick, *California Institute of Technology* (**16**, 1, p. 164)

Reply (**16**, 1, p. 165)

B98-061 Shock-Loss Model for Transonic and Supersonic Axial Compressors with Curved Blades. M. T. Schobeiri, *Texas A&M University* (**14**, 4, p. 470) Article

Technical Comment by N. A. Cumpsty, *University of Cambridge, England, UK*; and C. Freeman, *Rolls–Royce, plc., England, UK* (**16**, 1, p. 166)

Reply (**16**, 1, p. 168)

B00-001 Aerodynamic Analysis of an Installed Thrust Reverser. Daniel J. Strash and J. Michael Summa, *Analytical Methods, Inc.*; and Joel H. Frank and Robert Standish, *Hurel-Dubois, France* (**16**, 1, p. 10) Article based on AIAA Paper 97-3153

B00-002 Numerical Simulations and Planar Laser-Induced Fluorescence Imaging Results of Hypersonic Reactive Flows. Kazu Toshimitsu, *Kyushu University, Japan*; Akiko Matsuo, *Keio University, Japan*; and Michel R. Kamel, Christopher I. Morris, and Ronald K. Hanson, *Stanford University* (**16**, 1, p. 16) Article

B00-003 Numerical Investigation of Hydrogen Strut Injections into Supersonic Airflows. P. Gerlinger and D. Brüggemann, *University of Stuttgart, Germany* (**16**, 1, p. 22) Article

B00-004 Fuel Injection into a Supersonic Airflow by Means of Pylons. C. Gruenig, *Technical University of Munich, Germany*; V. Avrashkov, *Moscow Aviation Institute, Russia*; and F. Mayinger, *Technical University of Munich, Germany* (**16**, 1, p. 29) Article

B00-005 Self-Ignition and Supersonic Reaction of Pylon-Injected Hydrogen Fuel. C. Gruenig, *Technical University of Munich, Germany*; V. Avrashkov, *Moscow Aviation Institute, Russia*; and F. Mayinger, *Technical University of Munich, Germany* (**16**, 1, p. 35) Article

B00-006 Incomplete Mixing and Off-Design Effects on Shock-Induced Combustion Ramjet Performance. J. P. Sislian, R. Dudebout, J. Schumacher, M. Islam, and T. Redford, *University of Toronto, Canada* (**16**, 1, p. 41) Article

B00-007 Three-Dimensional Flow Analysis of Turbine Blade Cascades with Leading-Edge Ejection. Dieter Bohn, Volker Becker, and Karsten Kusterer, *Aachen University of Technology, Germany*; and Leonhard Fottner and Sabine Ardey, *University of the Armed Forces Munich, Germany* (**16**, 1, p. 49) Article

B00-008 Trailing-Edge Blowing for Reduction of Turbomachinery Fan Noise. J. M. Brookfield and I. A. Waitz, *Massachusetts Institute of Technology* (**16**, 1, p. 57) Article

B00-009 Computational Analysis of Stall and Separation Control in Centrifugal Compressors. Alex Stein, Saeid Niazi, and L. N. Sankar, *Georgia Institute of Technology* (**16**, 1, p. 65) Article based on AIAA Paper 98-0934

B00-010 Evaluation of Boundary Conditions for the Gust–Cascade Problem. R. Hixon, S.-H. Shih, and R. R. Mankbadi, *NASA John H. Glenn Research Center at Lewis Field* (**16**, 1, p. 72) Article based on AIAA Paper 98-2489

B00-011 Identifying Optimal Fan Compressor Pressure Ratios for the Mixed-Stream Turbofan Engine. Paul T. Millhouse, *NRO*; Stuart C. Kramer and Paul I. King, *Air Force Institute of Technology*; and Edward F. Mykytka, *University of Dayton* (**16**, 1, p. 79) Article

B00-012 Engine Case Externals Challenges and Opportunities. Mike Miller, Jeff Colehour, and Ken Dunkelberg, *The Boeing Company* (**16**, 1, p. 87) Article based on AIAA Paper 97-2728

B00-013 Very-Near-Field Plume Investigation of the Anode Layer Thruster. Matthew T. Domonkos, Alec D. Gallimore, Colleen M. Marrese, and James M. Haas, *University of Michigan* (**16**, 1, p. 91) Article based on AIAA Paper 97-3062

B00-014 Third Way of Development of Single-Stage-to-Orbit Propulsion. V. V. Balepin, *MSE Technology Applications, Inc.*; M. Maita, *National Aerospace Laboratory, Japan*; and S. N. B. Murthy, *Purdue University* (**16**, 1, p. 99) Article based on AIAA Paper 96-4495

B00-015 Ideal Gas Thermodynamic Properties of Propellants and Explosive Compounds. Alexander Burcat, *Technion—Israel Institute of Technology* (**16**, 1, p. 105) Article

B00-016 Mass Production of Antimatter for High-Energy Propulsion. Brice N. Cassenti, *United Technologies Research Center* (**16**, 1, p. 119) Article

B00-017 Regression Rate Behavior of Hybrid Rocket Solid Fuels. Martin J. Chiaverini, Nadir Serin, David K. Johnson, Yeu-Cherng Lu, Kenneth K. Kuo, and Grant A. Risha, *Pennsylvania State University* (**16**, 1, p. 125) Article

B00-018 Phase-Stabilized Ammonium Nitrate-Based Propellants Using Binders with N–N Bonds. Charlie Oommen and Sampat R. Jain, *Indian Institute of Science* (**16**, 1, p. 133) Article

B00-019 Improvements in the Chemical Stability of Double-Base Solid Rocket Propellants. M. H. Sammour, *Egyptian Armed Forces, Egypt* (**16**, 1, p. 139) Article

B00-020 Wall Curvature Effects on External Burning in Supersonic Flow. Giuseppe Bussi, Dario Pastrone, and Lorenzo Casalino, *Politecnico di Torino, Italy* (**16**, 1, p. 147) Technical Note

B00-021 Three-Dimensional Disturbance Vortex Method for Simulating Rotor/Stator Interaction in Turbomachinery. Xian Hong Wu, *Ben-Gurion University of the Negev, Israel*; and Mao Zhang Chen, *Beijing University of Aeronautics and Astronautics, PRC* (**16**, 1, p. 150) Technical Note

B00-022 Measurements of Turbulent Flow Structure in Supersonic Curved Wall Boundary Layers. R. D. W. Bowersox, *University of Alabama*; R. C. Wier and D. D. Glawe, *U.S. Air Force Research Laboratory*; and S. Gogineni, *Innovative Scientific Solutions, Inc.* (**16**, 1, p. 153) Technical Note

B00-023 Trajectory of a Liquid Jet Traversing Subsonic Airstreams. Takao Inamura, *Hirosaki University, Japan* (**16**, 1, p. 155) Technical Note

B00-024 Preliminary Mass Spectrometry of a Xenon Hollow Cathode. Mark W. Crofton, *The Aerospace Corporation* (**16**, 1, p. 157) Technical Note based on AIAA Paper 99-0454

B00-025 Study of Boundary-Layer Development in a Two-Stage Low-Pressure Turbine. Daniel J. Dorney, *Virginia Commonwealth University*; David E. Ashpis, *NASA John H. Glenn Research Center at Lewis Field*; and David E. Halstead and David C. Wisler, *General Electric Aircraft Engines* (**16**, 1, p. 160) Technical Note based on AIAA Paper 99-0742

B00-026 Confined Swirling Flows with Heat Release and Mixing. David S. Underwood, Ian A. Waitz, and Edward M. Greitzer, *Massachusetts Institute of Technology* (**16**, 2, p. 169) Article

B00-027 Numerical Investigation of Twin-Nozzle Rocket Plume Phenomenology. Houshang B. Ebrahimi, *Sverdrup Technology, Inc.*; Jay Levine, *U.S. Air Force Research Laboratory*; and Alan Kawasaki, *Sparta, Inc.* (**16**, 2, p. 178) Article

B00-028 Detailed Chemical–Kinetic Model for Aviation Fuels. R. P. Lindstedt, *Imperial College of Science, Technology, and Medicine, England, UK*; and L. Q. Maurice, *U.S. Air Force Research Laboratory* (**16**, 2, p. 187) Article

B00-029 Thrust Vector Control for (Clustered Modules) Plug Nozzles: Some Considerations. H. F. R. Schöyer, *European Space Agency/European Space Research and Technology Center, The Netherlands* (**16**, 2, p. 196) Article based on AIAA Paper 97-2823

B00-030 Optimizing Subcritical-Flow Thrust-Vectoring of Converging–Diverging Nozzles. Erich A. Wilson, Dan Adler, Benjamin Z. Bal-Or, Valery Sherbaum, and Michael Lichtsinder, *Technion—Israel Institute of Technology* (**16**, 2, p. 202) Article

B00-031 Direct Computation of Jet Noise Produced by Large-Scale Axisymmetric Structures. R. R. Mankbadi, S. H. Shih, R. Hixon, and L. A. Povinelli, *John H. Glenn Research Center at Lewis Field* (**16**, 2, p. 207) Article

B00-032 Flowfield near a Multiport Injector Array in a Supersonic Flow. L. S. Jacobsen, J. A. Schetz, and W. F. Ng, *Virginia Polytechnic Institute and State University* (**16**, 2, p. 216) Article based on AIAA Paper 98-3126

B00-033 Ignition Characteristics of Plasma Torch for Hydrogen Jet in an Airstream. Kenichi Takita, Tomokazu Uemoto, Takahiro Sato, Yiguang Ju, and Goro Masuya, *Tohoku University, Japan*; and Katsura Ohwaki, *Ishikawajima-Harima Heavy Industries Company, Ltd., Japan* (**16**, 2, p. 227) Article

B00-034 Two-Dimensional Nonadiabatic Injection into a Supersonic Freestream. Rodney D. W. Bowersox, *University of Alabama*; and K. Colin Tucker and Christopher D. Whitcomb, *Air Force Institute of Technology* (**16**, 2, p. 234) Article

B00-035 Propulsion System for Hypersonic Space Planes. Michael Zeutzius, Toshiaki Setoguchi, Kunio Terao, and Hideo Miyanishi, *Saga University, Japan* (**16**, 2, p. 243) Article based on AIAA Paper 98-1531 CP9804

B00-036 Pulse Detonation Magnetohydrodynamic Power. Ron J. Litchford, Bryan R. Thompson, and John T. Lineberry, *ERC Incorporated* (**16**, 2, p. 251) Article

B00-037 Magnetocombustion: A Thermodynamic Analysis. John Baker, *University of Alabama at Birmingham*; and Kozo Saito, *University of Kentucky* (**16**, 2, p. 263) Article

B00-038 Optimization of Ram Accelerator Systems Design. Xiaojian Wang, Elyeser Spiegler, and Yaakov M. Timnat, *Technion—Israel Institute of Technology* (**16**, 2, p. 269) Article

B00-039 Experimental Investigation of the Evaporation of Droplets in Axial Acoustic Fields. R. I. Sujith, *Indian Institute of Technology*; G. A. Waldherr, *General Electric Corporate R&D Center*; and J. I. Jagoda and B. T. Zinn, *Georgia Institute of Technology* (**16**, 2, p. 278) Article based on AIAA Paper 95-0485

B00-040 Effect of Inlet Conditions on Endwall Secondary Flows. Kristina S. Hermanson and Karen A. Thole, *University of Wisconsin* (**16**, 2, p. 286) Article

B00-041 Effect of Inner and Outer Airflow Characteristics on High Liquid Pressure Prefilming Airblast Atomization. J. S. Chin, N. K. Rizk, and M. K. Razdan, *Rolls–Royce Allison* (**16**, 2, p. 297) Article

B00-042 Progress in Modeling Pressure Oscillations in Regenerative Liquid Propellant Guns. T. P. Coffee, *U.S. Army Research Laboratory* (**16**, 2, p. 302) Article based on AIAA Paper 98-0645

B00-043 Eulerian Approach for Unsteady Two-Phase Solid Rocket Flows with Aluminum Particles. Eric Daniel, *Université de Provence, France* (**16**, 2, p. 309) Article based on AIAA Paper 98-3697

B00-044 Combustion Experiments in Hydrogen Peroxide/Polyethylene Hybrid Rocket with Catalytic Ignition. E. J. Wernimont and S. D. Heister, *Purdue University* (**16**, 2, p. 318) Article

B00-045 Time-Accurate Three-Dimensional Navier–Stokes Analysis of One-and-One-Half Stage Axial-Flow Turbine. Thomas W. Volmar, Bernard Brouillet, and Heinz E. Gallus, *Institut für Strahlantriebe und Turboarbeitsmaschinen, Germany*; and Hannes Benetschik, *AEA Technology GmbH, Germany* (**16**, 2, p. 327) Article

B00-046 Modeling of Turbine Engine Axial-Flow Compressor and Turbine Characteristics. Marek Orkisz and Slawomir Stawarz, *Rzeszów University of Technology* (**16**, 2, p. 336) Article

B00-047 New Gear-Fault-Detection Parameter by Use of Joint Time-Frequency Distribution. V. V. Polyshchuk, *B&C Engineering Associates, Inc.*; and F. K. Choy and M. J. Braun (**16**, 2, p. 340) Article

B00-048 Feasibility Assessment of Thermal Barriers for Extreme Transient Temperatures. Bruce M. Steinetz, *NASA John H. Glenn Research Center at Lewis Field*; and Patrick H. Dunlap Jr., *Modern Technologies Corporation* (**16**, 2, p. 347) Article

B00-049 Numerical Thermal Model of NASA Solar Electric Propulsion Technology Application Readiness Ion Thruster. Jonathan Van Noord and Alec Gallimore, *University of Michigan*; and Vincent K. Rawlin, *John H. Glenn Research Center at Lewis Field* (**16**, 2, p. 357) Article

B00-050 Joint Jet-A/Silane/Hydrogen Reaction Mechanism. Mark J. Lewis and Jee Su Chang, *University of Maryland* (**16**, 2, p. 365) Technical Note

B00-051 Lithium Peroxide Fuel Cells for Electric Vehicle Propulsion. Gautum Agarwal, *National Instiute for Aviation Research* (**16**, 2, p. 367) Technical Note

B00-052 Simulations of the Flow in Supersonic Turbines with Straight Centerline Nozzles. Daniel J. Dorney, *Virginia Commonwealth University*; Lisa W. Griffin, *NASA Marshall Space Flight Center*; and Karen L. Gundy-Burlet, *NASA Ames Research Center* (**16**, 2, p. 370) Technical Note

B00-053 Burning Behavior of Composite Propellants with Fast-Burning Inclusions. A. E. Fogelzang, A. P. Denisyuk, V. V. Serushkin, V. Yu. Egorshev, and V. P. Sinditskii, *Mendeleev University of Chemical Technology, Russia*; and A. D. Margolin, *Semenov Institute of Chemical Physics, Russia* (**16**, 2, p. 374) Technical Note

B00-054 Effects of Radial Location on the Migration of Hot Streaks in a Turbine. Karen L. Gundy-Burlet, *NASA Ames Research Center*; and Daniel J. Dorney, *Virginia Commonwealth University* (**16**, 3, p. 377) Article

B00-055 Viscous Three-Dimensional Simulation of Transonic Compressor Stage on Parallel Hardware. Gerd Fritsch and Martin Hoeger, *Motoren- und Turbinen-Union München GmbH, Germany*; and Cristoph Blaha and Dirk Bauer, *Technical University of Darmstadt, Germany* (**16**, 3, p. 388) Article based on AIAA Paper 97-2867

B00-056 Incidence Effects on Wake-Induced Transition on an Axial Compressor Blade. W. J. Solomon, *Ohio Aerospace Institute/General Electric Aircraft Engines*; and G. J. Walker, *University of Tasmania, Australia* (**16**, 3, p. 397) Article

B00-057 Experiment to Support the Formulation and Validation of Compressor-Face Boundary Conditions. Donald Freund, *Gulfstream Aerospace Corporation*; and Miklos Sajben, *University of Cincinnati* (**16**, 3, p. 406) Article

B00-058 Adiabatic Interaction of Particles with a Compressible Flow: Basic Mechanics. Francisco Ruiz, *Illinois Institute of Technology* (**16**, 3, p. 415) Article

B00-059 Experimental Investigation of Rotor-Inlet Guide Vane Interactions in Transonic Axial-Flow Compressor. Albert J. Sanders and Sanford Fleeter, *Purdue University* (**16**, 3, p. 421) Article

B00-060 Evaluating Efficiencies of Turbofan Jet Engines: A Data Envelopment Analysis Approach. Sean Bulla, William W. Cooper, and Dennis Wilson, *University of Texas at Austin*; and Kyung Sam Park, *KAIST, Korea* (**16**, 3, p. 431) Article

B00-061 Scarfing and Scalloping Effects on Lobed Forced Mixer at Low-Speed Conditions. S. C. M. Yu, Y. Hou, and W. K. Chan, *Nanyang Technological University, Republic of Singapore* (**16**, 3, p. 440) Article

B00-062 Transverse Injection from Circular and Elliptic Nozzles into a Supersonic Crossflow. M. R. Gruber and A. S. Nejad, *U.S. Air Force Research Laboratory*; T. H. Chen, *Taitech, Inc.*; and J. C. Dutton, *University of Illinois at Urbana–Champaign* (**16**, 3, p. 449) Article

B00-063 Flow of Gel Fuels in Tapered Injectors. Shai Rahimi and Benveniste Natan, *Technion—Israel Institute of Technology, Israel* (**16**, 3, p. 458) Article

B00-064 Streamline Tracing: Technique for Designing Hypersonic Vehicles. Frederick S. Billig, *PYRODYNE, Inc.*; and Ajay P. Kothari, *Astrox Corporation* (**16**, 3, p. 465) Article based on AIAA Paper 97-7197

B00-065 Wall Drag in Internal Mach-2 Flow with Cavity and Transpiration Injection. Linda A. Castiglone, *University of Washington*; G. Burton Northam and Ned R. Baker, *NASA Langley Research Center*; and Larry A. Roe, *University of Arkansas* (**16**, 3, p. 472) Article based on AIAA Paper 97-2891

B00-066 Restricted Shock Separation in Rocket Nozzles. Manuel Frey, *DLR, German Aerospace Research Center, Germany*; and Gerald Hagemann, *Dasa, DaimlerChrysler Aerospace, Germany* (**16**, 3, p. 478) Article

B00-067 Combustor Model for Simulation of Combustion Instabilities and Their Active Control. Rajendran Mohanraj, Yedidia Neumeier, and Ben T. Zinn, *Georgia Institute of Technology* (**16**, 3, p. 485) Article based on AIAA Paper 97-0466

B00-068 Convergence of Two Analytical Flowfield Models Predicting a Destabilizing Agent in Rocket Combustion. J. Majdalani, *Marquette University*; G. A. Flandro, *University of Tennessee Space Institute*; and T. S. Roh, *California Institute of Technology* (**16**, 3, p. 492) Article based on AIAA Paper 98-3698

B00-069 Nonpremixed Periodic Flames Supported by Heterogeneous Propellants. T. L. Jackson and J. Buckmaster, *University of Illinois at Urbana–Champaign* (**16**, 3, p. 498) Article

B00-070 Line-of-Sight Variations of Temperature and Species in Solid Propellant Flames. Carl F. Mallery Jr. and Stefan T. Thynell, *Pennsylvania State University* (**16**, 3, p. 505) Article

B00-071 Flame/Stretch Interactions of Premixed Fuel-Vapor/O_2/N_2 Flames. O. C. Kwon, M. I. Hassan, and G. M. Faeth, *University of Michigan* (**16**, 3, p. 513) Article

B00-072 Ultrasonic Method Applied to Full-Scale Solid Rocket Motors. Franck Cauty, *ONERA, France* (**16**, 3, p. 523) Article

B00-073 Measurements of Ions from High-Current Hollow Cathodes Using Electrostatic Energy Analyzer. Ikuya Kameyama and Paul J. Wilbur, *Colorado State University* (**16**, 3, p. 529) Article

B00-074 Three-Dimensional Numerical Simulation of Field-Emission-Electric-Propulsion Neutralization. M. Tajmar, *Vienna University of Technology, Austria*; and J. Wang, *Jet Propulsion Laboratory, California Institute of Technology* (**16**, 3, p. 536) Article

B00-075 Utilization of High-Density Strained Hydrocarbon Fuels for Propulsion. Gabriel D. Roy, *Office of Naval Research* (**16**, 4, p. 546) Article

B00-076 Analysis of Combustion Characteristics of Coaxial Jet Diffusion Flame with Steam Addition. D. Zhao, *Nagoya University, Japan*; H. Yamashita, T. Furuhata, and N. Arai, *Nagoya University, Japan* (**16**, 4, p. 552) Article

B00-077 Power Generation Analysis for High-Temperature Gas Turbine in Thermodynamic Process. Hiroshi Taniguchi, *Hokkai Gakuen University, Japan*; Sigehiro Miyamae, *Ishikawajim-Harima Heavy Industries Company, Ltd., Japan*; Noam Lior, *University of Pennsylvania*; Norio Arai, *Nagoya University, Japan*(**16**, 4, p. 557) Article

B00-078 Double Reheat Rankine Cycle for Hydrogen-Combustion, Turbine Power Plants. Masafumi Fukuda and Yoshikazu Dozono, *Toshiba Corporation, Japan* (**16**, 4, p. 562) Article

B00-079 Enhancing Direct-Fired Power Plants Performance by Use of Gas Turbine Technology. Mikhail Korobitsyn, *Netherlands Energy Research Foundation, The Netherlands* (**16**, 4, p. 568) Article

B00-080 Status and Perspective of Externally Fired Gas Turbines. J. Yan and L. Eidensten, *Royal Institute of Technology, Sweden* (**16**, 4, p. 572) Article

B00-081 Miniaturization Technologies for Advanced Energy Conversion and Transfer Systems. Timothy A. Ameel and Ian Papautsky, *University of Utah;* Robert O. Warrington, *Michigan Technological University*; Robert S. Wegeng and M. Kevin Drost, *Pacific Northwest National Laboratories* (**16**, 4, p. 577) Article

B00-082 Gas Turbine Heat Transfer: Past and Future Challanges. Ralf Schiele and Sigmar Wittig, *University of Karlsruhe, Germany* (**16**, 4, p. 583) Article

B00-083 Investigation of Regenerative Combustion Using a Heavy Fuel Oil. I-Te Huang, Wen-Chen Chang, Wei-Min Chern, and Rey-Chein Chang, *Industrial Technology Research Institute, ROC* (**16**, 4, p. 590) Article

B00-084 Visualisation of Fuel Jet in Conditions of Highly Preheated Air Combustion. S. Lille, T. Dobski, and W. Blasiak, *Royal Institute of Technology (KTH), Sweden* (**16**, 4, p. 595) Article

B00-085 Characteristics of Pulverized Coal Combustion in High-Temperature Preheated Air. Takashi Kiga, *Ishikawajima-Harima Heavy Industries Company, Ltd., Japan*; Kunio Yoshikawa, *Tokyo Institute of Technology, Japan*; Masaru Sakai, *Electric Power Development Company, Ltd., Japan*; Susumu Mochida, *Nippon Furnace Kogyo Kaisha, Ltd., Japan* (**16**, 4, p. 601) Article based on AIAA Paper 99-0730

B00-086 Gasification Characteristics of Biomass Wastes in Fluidized Bed Gasifier. Ping Liu, Xiaofen Guo, Chuangzhi Wu, and Yong Chen, *Chinese Academy of Sciences, PRC*; Norio Arai, *Nagoya University, Japan* (**16**, 4, p. 606) Article

B00-087 Modeling of Oxy-Natural Gas Combustion Chemistry. Anders Brink and Mikko Hupa, *Åbo Akademi University, Finland*; Frederic Breussin, Nicolas Lallemant, and Roman Weber, *International Flame Research Foundation* (**16**, 4, p. 609) Article

B00-088 Thermal Destruction of Cellulose and Surrogate Solid Wastes. Ashwani K. Gupta, *University of Maryland* (**16**, 4, p. 615) Article

B00-089 Stability of Plane Liquid Sheets in Compressible Gas Streams. Jianming Cao, *Chang'an University, PRC*; Xianguo Li, *University of Waterloo, Canada* (**16**, 4, p. 623) Article

B00-090 Recent Advances in Soot Formation from Spherical Droplet Flames at Atmospheric Pressure. C. Thomas Avedisian, *Cornell University* (**16**, 4, p. 628) Article

B00-091 Influence of Exhaust Aftertreatment Devices on a Heavy-Duty Diesel Engine's Particulate Emissions. George Toussimis and Euripides Lois, *National Technical University of Athens, Greece*; Hartmut Lüders, *FEV Motorentechnik Aachen, Germany* (**16**, 4, p. 636) Article

B00-092 Fire Development Calculations. David G. Lilley, *Lilley and Associates* (**16**, 4, p. 641) Article based on AIAA Paper 98-0267

B00-093 Minimum Safe Distance from Pool Fires. David G. Lilley, *Lilley and Associates* (**16**, 4, p. 649) Article based on AIAA Paper 99-0342

B00-094 Transition in Boundary Layers on a Concave Surface. S. H. Winoto, D. H. Zhang, and Y. T. Chew, *National University of Singapore, Republic of Singapore* (**16**, 4, p. 653) Article

B00-095 Localized Thermal Buckling Due to Hot Streaks in a Combustor Liner. W. Z. Zhuang and N. S. Swansson, *Defence Science and Technology Organisation, Australia* (**16**, 4, p. 661) Article

B00-096 Thermal State-of-Charge of Space Solar Dynamic Heat Receivers. Carsie A. Hall, III, *University of New Orleans*; Emmanuel K. Glapke and Joseph N. Cannon, *Howard University*; Thomas W. Kerslake, *NASA John H. Glenn Research Center at Lewis Field* (**16**, 4, p. 666) Article

B00-097 Effect of Initial Velocity Profile on the Development of Round Jets. E. Ferdman, M. V. Ötügen, and S. Kim, *Polytechnic University* (**16**, 4, p. 676) Article based on AIAA Paper 99-0159

B00-098 Feasibility Study for Performance Prediction of Circumferentially Compound-Stage Model Turbines. André P. Saxer, Hélène M. Saxer-Felici, Damian M. A. Vogt, Michael Sell, and George Gyarmathy, *Swiss Federal Institute of Technology, Switzerland* (**16**, 4, p. 687) Article based on AIAA Paper 98-3902

B00-099 Numerical Investigation of Installation Effects in Turbofan Engines. W. G. Joo, *Yonsei University, Korea* (**16**, 4, p. 697) Article

B00-100 Energy Management in Rocket Propulsion. Guido Colasurdo and Lorenzo Casalino, *Politecnico di Torino, Italy* (**16**, 4, p. 705) Article

B00-101 Comparison of Supersonic Combustion Between Impulse and Vitiation-Heated Facilities. R. R. Boyce, *Imperial College of Science, Technology, and Medicine, England, UK*; A. Paull and R. J. Stalker, *University of Queensland, Australia*; M. Wendt, *National Aerospace Laboratory, Australia*; N. Chinzei and H. Miyajima, *National Aerospace Laboratory, Japan* (**16**, 4, p. 709) Article

B00-102 Unstarted Inlet for Direct-Connect Combustor Experiments in a Shock Tunnel. R. R. Boyce, A. Paull and R. J. Stalker, *Centre for Hypersonics, The University of Queensland, Australia* (**16**, 4, p. 718) Technical Note

B00-103 Reference Spray Combustion Facility for Computational Fluid Dynamics Model Validation. John F. Widmann, S. Rao Charagundla, and Cary Presser, *National Institute of Standards and Technology*, (**16**, 4, p. 720) Article

B00-104 Role of Curing Agents on Decomposition and Explosion of Glycidyl Azide Polymers. Surenda P. Panda, Sanjay K. Sahu, Dinkar S. Sadafule, and Jyotsna V. Thakur, *Institute of Armament Technology, India* (**16**, 4, p. 723) Technical Note

B00-105 Numerical Simulation of Axisymmetric Solid Rocket Motor Ignition Transient with Radiation Effect. In Hyun Cho, *Korea Aerospace Research Institute, Korea*; Seung Wook Baek, *Korea Advanced Institute of Science and Technology, Korea* (**16**, 4, p. 725) Article based on AIAA Paper 96-2906

B00-106 Optimization of Jet Mixing into a Rich, Reacting Crossflow. M. Y. Leong and G. S. Samuelsen, *University of California, Irvine*; J. D. Holdeman, *NASA John H. Glenn Research Center at Lewis Field* (**16**, 5, p. 729) Article

B00-107 Propagation of Spinning Acoustic Modes in Turbofan Exhaust Ducts. M. Nallasamy, *DYNACS Engineering Company*; D. L. Sutliff, *AYT Corporation*; L. J. Heidelberg, *NASA John H. Glenn Research Center at Lewis Field* (**16**, 5, p. 736) Article based on AIAA Paper 99-0481

B00-108 Unsteady Viscous Flow Causing Rotor-Stator Interaction in Turbines, Part 1: Data, Code Pressure. B. Lakshminarayana, A. Chernobrovkin, and D. Ristic, *Pennsylvania State University* (**16**, 5, p. 744) Article based on AIAA Paper 98-3595

B00-109 Unsteady Viscous Flow Causing Rotor-Stator Interaction in Turbines, Part 2: Simulation, Integrated Flowfield, and Interpretation. A. Chernobrovkin, and B. Lakshminarayana, *Pennsylvania State University* (**16**, 5, p. 751) Article based on AIAA Paper 98-3596

B00-110 Analytical and Experimental Assessment of Two Methods of Determining Turbine Efficiency. Susan T. Hudson, *NASA Marshall Space Flight Center*; Hugh W. Coleman, *University of Alabama in Huntsville* (**16**, 5, p. 760) Article based on AIAA Paper 98-2711

B00-111 Unsteady Blade-Row Flow Calculations Using a Low-Reynolds-Number Turbulence Model. Chang Ho Choi, and Jung Yul Yoo, *Seoul National University, Korea* (**16**, 5, p. 768) Article

B00-112 Fluid Circuit Model for Long-Bearing Squeeze Film Damper Rotordynamics. Paul A. Schallhorn, David A. Elrod, and David G. Goggin and Alok K. Majumdar, *Sverdrup Technology* (**16**, 5, p. 777) Article based on AIAA Paper 98-3683

B00-113 Bleed Valve Rate Requirements Evaluation in Rotating Stall Control on Axial Compressors. Simon Yeung, *General Electric Company*; Yong Wang and Richard M. Murray, *California Institute of Technology* (**16**, 5, p. 781) Article

B00-114 Dynamic Simulation of a Wave-Rotor-Topped Turboshaft Engine. R. B. Greendyke, *University of Texas at Tyler*; D. E. Paxson, *NASA John H. Glenn Research Center at Lewis Field*; M. T. Schobeiri, *Texas A&M University* (**16**, 5, p. 792) Article based on AIAA Paper 97-3143

B00-115 Survey of Advancements in Jet-Engine Thermodynamic Simulation. Vivek Sanghi, B. K. Lakshmanan, and V. Sundararajan, *Gas Turbine Research Establishment, India* (**16**, 5, p. 797) Article

B00-116 Analysis of Transient Thermal Choking Processes in a Model Scramjet Engine. S. O'Byrne, M. Doolan, and S. R. Olsen and A. F. P. Houwing, *Australian National University, Australia* (**16**, 5, p. 808) Article

B00-117 Design and Control of Solid-Fuel Ramjet for Pseudo-vacuum Trajectories. S. Krishnan, Philmon George, and S. Sathyan, *Indian Institute of Technology Madras, India* (**16**, 5, p. 815) Article

B00-118 Injection and Mixing Processes in High-Pressure Liquid Oxygen/Gaseous Hydrogen Rocket Combustors. W. Mayer, A. Schik, and M. Schäffler, *DLR, German Aerospace Research Center, Germany*; H. Tamura, *National Aerospace Laboratory,Japan* (**16**, 5, p. 823) Article based on AIAA Paper 96-2620

B00-119 Analysis of Gaseous Fuel and Air Mixing in Flames and Flame Quenching. Dan Brasoveanu and Ashwani K. Gupta, *University of Maryland* (**16**, 5, p. 829) Article

B00-120 Effect of Inlet Turbulence and Premixer Length on Fuel Distribution in a Swirling Gas-Turbine Premixer. S. F. Frey, A. R. Eaton, D. M. Cusano and M. W. Plesniak, *Purdue University*; P. E. Sojka, *Purdue University* (**16**, 5, p. 837) Article

B00-121 **Role of Oxygen-Enriched Atomization in Kerosene Spray Flames.** A. K. Gupta and T. Damm, *University of Maryland;* S. R. Charagundla and C. Presser, *National Institute of Standards and Technology* (**16**, 5, p. 845) Article

B00-122 **Overview of World Space Launches.** I-Shih Chang, *The Aerospace Corporation* (**16**, 5, p. 853)Article

B00-123 **Oscillatory Combustion of Fine-AP/HTPB Propellants: Disproportionate Pyrolysis Response.** S. R. Hickman and M. Q. Brewster, *University of Illinois at Urbana-Champaign* (**16**, 5, p. 867) Article

B00-124 **Prediction of the Dissipation of a Solid-Rocket Contrail.** Eugene Miller, *Mackay School of Mines University of Nevada* (**16**, 5, p. 874) Article

B00-125 **On-Orbit Demonstration of a Pulsed Self-Field Magnetoplasmadynamic Thruster System.** K. Toki, Y. Shimizu, and K. Kuriki, *Institute of Space and Astronautical Science, Japan* (**16**, 5, p. 880) Article

B00-126 **Applied-Field Magnetoplasmadynamic Thrusters, Part 1: Numerical Simulations Using the MACH2 Code.** Pavlos G. Mikellides and Peter J. Turchi, *Ohio State University;* Norman F. Roderick, *University of New Mexico* (**16**, 5, p. 887) Article

B00-127 **Applied-Field Magnetoplasmadynamic Thrusters, Part 2: Analytic Expressions for Thrust and Voltage.** Pavlos G. Mikellides and Peter J. Turchi, *Ohio State University* (**16**, 5, p. 894) Article

B00-128 **Computation of the Plume of an Anode-Layer Hall Thruster.** Iain D. Boyd , *Cornell University* (**16**, 5, p. 902) Article

B00-129 **Investigation of the Operating Characteristics of a High-Power Hall Effect Thruster.** Boris Arhipov, Leonid Krochak, and Nikolay Maslennikov, *Experimental Design Bureau "Fakel", Russia*; Fabrizio Scortecci, *CENTROSPAZIO, Italy* (**16**, 5, p. 910) Article

B00-130 **Ion-Energy Diagnositcs in the Plasma Exhaust Plume of a Hall Thruster.** Lyon B. King and Alec D. Gallimore, *University of Michigan* (**16**, 5, p. 916) Article

B00-131 **Antimatter Requirements and Energy Costs for Near-Term Propulsion Applications.** G. R. Schmidt, H. P. Gerrish, and J. J. Martin, *NASA Marshall Space Flight Center*; G. A. Smith, *Pennsylvania State University*; K. J. Meyer, *Pennsylvania State University*; (**16**, 5, p. 923) Article

B00-132 **Optimization of Orifice Geometry for Crossflow Mixing in a Cylindrical Duct.** J. T. Kroll, W. A. Sowa, and G. S. Samuelsen, *University of California, Irvine*; J. D. Holdeman, *NASA John H. Glenn Research Center* (**16**, 6, p. 929) Article

B00-133 **Comparison of Spray/Wall Impingement Models with Experimental Data.** Seong Hyuk Lee and Hong Sun Ryou, *Chung-Ang University, Korea* (**16**, 6, p. 939) Article

B00-134 **Numerical Study of Fuel Mixing Enhancement Using an Oblique Shock/Vortex Ineraction**. Ashish Nedungadi and Mark J. Lewis *University of Maryland* (**16**, 6, p. 946) Article

B00-135 **Maximum Mixing Times of Methane and Air.** Dan Brasoveanu and Ashwani K. Gupta, *University of Maryland* (**16**, 6, p. 956) Article

B00-136 **Multicomponent-Fuel Film-Vaporization Model for Multidimensional Computations.** Yangbing Zeng and Chia-Fon Lee, *University of Illinois at Urbana-Champaign* (**16**, 6, p. 964) Article

B00-137 **Soot Patterns Around Suspended *n*-Heptane Droplet Flames in a Convection-Free Environment.** C. Thomas Avedisian, *Cornell University*; Gregory S. Jackson, *University of Maryland* (**16**, 6, p. 974) Article

B00-138 **Effect of Sauter Mean Diameter on the Combustion Related Parameters in Heavy-Duty Diesel Engines.** Stanislav N. Danov, *University of Maryland*; Ashwani K. Gupta, *University of Maryland* (**16**, 6, p. 980) Article

B00-139 **Predicting Effectiveness of H_20 Injection for NOx Reduction in Stationary Gas Turbines.** A. M. Mellor, *Vanderbilt University*; (**16**, 6, p. 988) Article

B00-140 **Broadband Infrared Absorption Sensor for High-Pressure Combustor Control.** J. M. Seitzman and B. T. Scully, *Georgia Institute of Technology* (**16**, 6, p. 994) Article

B00-141 **Computation of Gas-Liquid Droplet Cascade Flows Using Multigrid Adaptive Unstructured Grid.** Ki-Cheol Park, *Samsung Aerospace Industries, Ltd., Korea*; Keun-Shik Chang, *Korea Advanced Institute of Science and Technology, Korea* (**16**, 6, p. 1002) Article

B00-142 **Performance of Evaporative Cycle Gas Turbines Derived from Aeroengines.** Sergio Mario Camporeale, *Università di Reggio Calabria, Italy*; Bernardo Fortunato, *Politecnico di Bari, Italy* (**16**, 6, p. 1011) Article

B00-143 **Determination of Triggering Condition of Vortex-Driven Acoustic Combustion Instability in Rocket Motors.** Wen-Jing Wu and Li-Chung Kung, *Chung Shan Institute of Science and Technology, Taiwan, ROC* (**16**, 6, p. 1022) Article

B00-144 **Computational Analysis for Rocket-Based Combined-Cycle Systems During Rocket-Only Operation.** C. J. Steffen Jr., T. D. Smith, and S. Yungster, *NASA John H. Glenn Research Center*; D. J. Keller, *Real World Quality Systems, Inc.* (**16**, 6, p. 1030) Article

B00-145 **Starting Envelope of the Subdetonative Ram Accelerator.** E. Schultz, C. Knowlen, and A. P. Bruckner, *University of Washington* (**16**, 6, p. 1040) Article

B00-146 **Work Interaction in Quasi-One-Dimensional Flows.** Thomas Scott, *University of Missouri-Rolla*; David W. Riggins, *University of Tennessee* (**16**, 6, p. 1053) Article

B00-147 **Longitudinally Stratified Combustion in Wave Rotors.** M. Razi Nalim, *Indiana University-Purdue University at Indianapolis* (**16**, 6, p. 1060) Article

B00-148 **Solid-Fuel Ramjet Regulation by Means of an Air-Division Valve.** Deborah Pelosi-Pinhas and Alon Gany, *Technion-Israel institute of Technology* (**16**, 6, p. 1069) Article

B00-149 **Impingement Heating and Ignition of Condensed-Phase Energetic Materials.** Mohammad K. Alkam, *Jordan University of Science and Technology, Jordan*; P. Barry Butler, *University of Iowa* (**16**, 6, p. 1075) Article

B00-150 **Development of the Low-Power Xenon Ion Thruster for Lightweight Satellites.** O. A. Gorshkov, *Keldysh Research Center, Russia*; V. G. Grigor'yan, *Moscow Aviation Institute, Russia*; V. A. Muravlev, *Keldysh Research Center, Russia* (**16**, 6, p. 1083) Article based on AIAA Paper 96-2990

B00-151 **Mass Spectral Measurements in the Plume of an SPT-100 Hall Thruster.** Lyon B. King, Alec D. Gallimore, *University of Michigan* (**16**, 6, p. 1086) Article

B00-152 **Electrical Characteristics of Magnetohydrodynamic-Generator Sidewalls with Segmented Z-Bar Design.** Carlson C. P. Pian, *Mississippi State University*; Stanley W. Petty, *Textron, Inc.* (**16**, 6, p. 1093) Article

B00-153 **Pulsed Fusion Propulsion System for Rapid Interstellar Missions.** Terry Kammash, *University of Michigan* (**16**, 6, p. 1100) Article

B00-154 **Regenerative Solid Oxide Fuel Cells for Mars Exploration.** K. R. Sridhar, *University of Arizona*; R. Foerstner, *Universität Stuttgart* (**16**, 6, p. 1105) Article based on AIAA Paper 98-0650

B00-155 Optimal Allocation with Network Limitation for Autonomous Space Power System. James A. Momoh , and Jizhong Zhu, *Howard University*; Jim L. Dolce, *NASA John H. Glenn Research Center at Lewis Field* (**16**, 6, p. 1112) Article

B00-156 Application of Bethe-Zel'dovich-Thompson Fluids in Organic Rankine Cycle Engines. Brady P. Brown, *Krispin Technologies, Inc*, Brian M. Argrow, *University of Colorado* (**16**, 6, p. 1118) Article

B00-157 Performance Analysis for High-Speed Missile Inlets. Christophe Bourdeau, Michaël Blaize, and Doyle Knight, *Rutgers University* (**16**, 6, p. 1125) Article based on AIAA Paper 99-0611

B00-158 Automated Design of a Three-Dimensional Subsonic Diffuser. Wei-Li Zhang, Doyle D. Knight, and Don Smith, *Rutgers University* (**16**, 6, p. 1132) Article

B00-159 Simulation of Coupled Unsteady Flow and Heat Conduction in a Turbine Stage. Douglas L. Sondak, *Boston University*; Daniel J. Dorney, *Virginia Commonwealth University* (**16**, 6, p. 1141) Article based on AIAA Paper 99-2521

B00-160 Mechanical Coupling Effects on Turbomachine Mistuned Response. James A. Kenyon, Charles J. Cross, andGregory R. Minkiewicz, *U.S. Air Force Research Laboratory* (**16**, 6, p. 1149) Article

B00-161 Hub-Based Vibration Control of Multiple Rotating Airfoils. György Szász, George T. Flowers, and Roy J. Hartfield, *Auburn University* (**16**, 6, p. 1155) Article based on AIAA Paper 98-3312

B00-162 Linear Versus Quadratic Amplitude Feedback in Active Control of Compressor Rotating Stall. Nikos Markopoulos Yedidia Neumeier, and J. V. R. Prasad, *Georgia Institute of Technology*; Ben T. Zinn, *Georgia Institute of Technology*, (**16**, 6, p. 1164) Article based on AIAA Paper 98-0971

B00-163 Three-Dimensional Automatic Optimization Method for Turbomachinery Blade Design. K. F. C. Yiu and M. Zangeneh, *University College London, England, UK* (**16**, 6, p. 1174) Article

B00-164 Thixotropic Effect of Inorganic Gel Fuels. Shai Rahimi, and Benveniste Natan, *Technion-Israel Institute of Technology, Israel* (**16**, 6, p. 1182) Technical Note

Statement of Ownership, Management, and Circulation

1. Publication Title	2. Publication Number	3. Filing Date
Journal of Propulsion and Power	0 7 4 8 - 4 6 5 8	10/1/00
4. Issue Frequency: Bi-monthly	5. Number of Issues Published Annually: 6	6. Annual Subscription Price: $45/$495

7. Complete Mailing Address of Known Office of Publication (Not printer) (Street, city, county, state, and ZIP+4): AIAA, 1801 Alexander Bell Drive, Reston, VA, 20191 — Contact Person: Aimee Munyan; Telephone: 703.264.7500

8. Complete Mailing Address of Headquarters or General Business Office of Publisher (Not printer): AIAA (above)

9. Full Names and Complete Mailing Addresses of Publisher, Editor, and Managing Editor (Do not leave blank)

Publisher (Name and complete mailing address): Norma Brennan, AIAA (above)

Editor (Name and complete mailing address): R.H.Woodward Wasche, 4319 Banbury Drive, Gainesville, VA, 20155

Managing Editor (Name and complete mailing address): Aimee Munyan, AIAA (above)

10. Owner (Do not leave blank. If the publication is owned by a corporation, give the name and address of the corporation immediately followed by the names and addresses of all stockholders owning or holding 1 percent or more of the total amount of stock. If not owned by a corporation, give the names and addresses of the individual owners. If owned by a partnership or other unincorporated firm, give its name and address as well as those of each individual owner. If the publication is published by a nonprofit organization, give its name and address.)

Full Name	Complete Mailing Address
American Institute of Aeronautics and Astronautics	1801 Alexander Bell Dr., Reston, VA 20191

11. Known Bondholders, Mortgagees, and Other Security Holders Owning or Holding 1 Percent or More of Total Amount of Bonds, Mortgages, or Other Securities. If none, check box → ☐ None

Full Name	Complete Mailing Address

12. Tax Status (For completion by nonprofit organizations authorized to mail at nonprofit rates) (Check one)
The purpose, function, and nonprofit status of this organization and the exempt status for federal income tax purposes:
☒ Has Not Changed During Preceding 12 Months
☐ Has Changed During Preceding 12 Months (Publisher must submit explanation of change with this statement)

PS Form **3526**, October 1999 (See instructions on Reverse)

13. Publication Title: Journal of Propulsion and Power	14. Issue Date for Circulation Data Below: Nov/Dec 2000	
15. Extent and Nature of Circulation	Average No. Copies Each Issue During Preceding 12 Months	No. Copies of Single Issue Published Nearest to Filing Date
a. Total Number of Copies (Net press run)	1933	1800
b. Paid and/or Requested Circulation (1) Paid/Requested Outside-County Mail Subscriptions Stated on Form 3541. (Include advertiser's proof and exchange copies)	1360	1326
(2) Paid In-County Subscriptions Stated on Form 3541 (Include advertiser's proof and exchange copies)		
(3) Sales Through Dealers and Carriers, Street Vendors, Counter Sales, and Other Non-USPS Paid Distribution		
(4) Other Classes Mailed Through the USPS		
c. Total Paid and/or Requested Circulation (Sum of 15b. (1), (2),(3), and (4)) ▶	1360	1326
d. Free Distribution by Mail (Samples, complimentary, and other free) (1) Outside-County as Stated on Form 3541	106	19
(2) In-County as Stated on Form 3541		
(3) Other Classes Mailed Through the USPS		
e. Free Distribution Outside the Mail (Carriers or other means)		
f. Total Free Distribution (Sum of 15d. and 15e.) ▶	106	19
g. Total Distribution (Sum of 15c. and 15f) ▶	1466	1345
h. Copies not Distributed	468	455
i. Total (Sum of 15g. and h.) ▶	1933	1800
j. Percent Paid and/or Requested Circulation (15c. divided by 15g. times 100)	70.4%	73.7%

16. Publication of Statement of Ownership
☐ Publication required. Will be printed in the Nov/Dec 2000 issue of this publication. ☐ Publication not required.

17. Signature and Title of Editor, Publisher, Business Manager, or Owner: Norma Brennan, Director of Publications — Date: 10/26/00

I certify that all information furnished on this form is true and complete. I understand that anyone who furnishes false or misleading information on this form or who omits material or information requested on the form may be subject to criminal sanctions (including fines and imprisonment) and/or civil sanctions (including civil penalties).

Instructions to Publishers

1. Complete and file one copy of this form with your postmaster annually on or before October 1. Keep a copy of the completed form for your records.
2. In cases where the stockholder or security holder is a trustee, include in items 10 and 11 the name of the person or corporation for whom the trustee is acting. Also include the names and addresses of individuals who are stockholders who own or hold 1 percent or more of the total amount of bonds, mortgages, or other securities of the publishing corporation. In item 11, if none, check the box. Use blank sheets if more space is required.
3. Be sure to furnish all circulation information called for in item 15. Free circulation must be shown in items 15d, e, and f.
4. Item 15h., Copies not Distributed, must include (1) newsstand copies originally stated on Form 3541, and returned to the publisher, (2) estimated returns from news agents, and (3), copies for office use, leftovers, spoiled, and all other copies not distributed.
5. If the publication had Periodicals authorization as a general or requester publication, this Statement of Ownership, Management, and Circulation must be published; it must be printed in any issue in October or, if the publication is not published during October, the first issue printed after October.
6. In item 16, indicate the date of the issue in which this Statement of Ownership will be published.
7. Item 17 must be signed.

Failure to file or publish a statement of ownership may lead to suspension of Periodicals authorization.
